

Mykola Khytra

Senior QA Engineer — Automation & AI Focus

Poland · Open to Remote | mykola.m.khytra@gmail.com | linkedin.com/in/mykola-khytra | github.com/mykolakhy

PROFESSIONAL SUMMARY

Senior QA Engineer with 5+ years of experience across Manual and Automation QA. Specialized in TypeScript, Playwright, Jest/Vitest, and CI/CD optimization at scale. Experienced in building reliable automation ecosystems and integrating AI-assisted engineering workflows into daily QA processes.

CORE SKILLS

Automation: TypeScript, JavaScript, Playwright, Jest, Vitest, API/UI Automation

CI/CD & Monitoring: CircleCI, GitHub, Datadog, Parallel Execution, CI Failure Analysis

QA & Test Management: API Testing, Postman, Swagger, Jira, TestRail, Testomat

AI-assisted Engineering: Codex, Claude Code, GitHub Copilot, Agent Skills, Repository Conventions

PROFESSIONAL EXPERIENCE

Shelf — Senior Automation QA Engineer

Jan 2024 – Jul 2026

Remote

- Maintained and evolved a TypeScript automation ecosystem with 1,200+ test specifications and 11,000+ automated API and UI scenarios.
- Improved CI execution speed by up to 4x through concurrent execution and multiple workers.
- Refactored the automation architecture and introduced reusable components and retry mechanisms, improving maintainability and test stability.
- Built a Datadog dashboard for automation monitoring and execution analytics.
- Led the TestRail-to-Testomat migration and contributed to code reviews, documentation, and shared automation standards.
- Created AI agent skills and repository conventions, mentored QA engineers, and delivered Testing Excellence presentations.
- Automated nearly all API checks for one of the company's projects, enabling automated regression execution and significantly reducing repetitive manual validation.
- Developed reusable API clients, fixtures, helpers, and shared utilities; optimized test data setup and environment cleanup.
- Supported overnight regression workflows across approximately 30 of 70 CI jobs by investigating failures and analyzing logs, test results, and execution patterns.

Shelf — Hybrid Quality Assurance Engineer

Oct 2022 – Jan 2024

Lviv, Ukraine

- Developed and maintained automated tests using Playwright, Jest, TypeScript, and JavaScript, with CI-driven execution on CircleCI.
- Performed manual and automated testing in a 70% manual / 30% automation role.
- Designed and executed functional, regression, smoke, exploratory, and API tests.
- Managed test cases in TestRail, participated in code reviews, and collaborated with developers and QA engineers on framework and process improvements.

Shelf — Junior Quality Assurance Engineer

Nov 2021 – Oct 2022

Lviv, Ukraine

- Performed manual, API, and WebSocket testing across functional, exploratory, smoke, and non-functional areas.
- Worked with test cases, defect reporting, and technical documentation.

StarApps — Trainee QA Engineer

Apr 2021 – Oct 2021

Lviv, Ukraine

- Tested web and desktop applications in EV charging and energy commodities domains.
- Performed functional, regression, exploratory, usability, and API testing; created test cases and tracked defects.
