

Mykola Khytra

Senior QA Engineer | Automation & Quality Engineering

Krakow, Poland | Open to remote roles

mykola.m.khytra@gmail.com | linkedin.com/in/mykola-khytra | github.com/mykolakhy

QA engineer with 5+ years of experience, including hands-on TypeScript automation. Focused on maintainable API and UI coverage, faster CI feedback, actionable failures, and shared engineering standards.

CORE SKILLS

TypeScript, JavaScript, Playwright, Jest, Vitest, REST API testing, Axios, Git, CircleCI, GitHub Actions, Datadog, Testomat, test strategy, code review, AI-assisted engineering.

EXPERIENCE

Shelf - Senior Automation QA Engineer

January 2024 - July 2026 | Remote

- Maintained and evolved a shared TypeScript ecosystem with 1,200+ test specs and 11,000+ API and UI scenarios, used by 10-15 QA automation engineers. These figures describe the team ecosystem, not individual authorship.
- Improved one regression CI job from approximately 60 to 15 minutes through concurrent execution with multiple workers.
- Built nearly all automated API checks for one project, with reusable Axios clients, fixtures, helpers, and test-data setup and cleanup.
- Refactored shared code, investigated flaky tests, reviewed changes, and documented engineering conventions. Created a Datadog dashboard and led the TestRail-to-Testomat migration.

Shelf - Hybrid QA Engineer

October 2022 - January 2024 | Lviv, Ukraine

- Combined manual testing with Playwright, Jest, TypeScript, and CircleCI automation. Covered functional, regression, smoke, and API testing based on product risk.

Shelf - Junior QA Engineer

November 2021 - October 2022 | Lviv, Ukraine

- Performed manual, API, and WebSocket testing; maintained test documentation and investigated defects.

StarApps - Trainee QA Engineer

April 2021 - October 2021 | Lviv, Ukraine

- Tested web and desktop products for EV charging and energy-related domains, including functional, exploratory, usability, and API checks.
